- Support other team members in debugging and problem solving.

Participated projects

I participated many projects during 3.5 years. These are highlighted projects

- <http://www.minhthanhthackles.com/>
- <http://theconceptshop.vn/>
- <http://www.saigonpavillon.vn/>
- <http://chefmamma.vn/>
- <http://www.sunrisemethod.com/>
- <http://www.jescoasia.com/>
- <http://captivae.com/>
- <http://www.personallogrupe.lt/>

Soft skills

Working management

- I always list everything needed to build in feature breakdown table or in tree before starting projects
- Follow along with project progress and releasing requirements, I groups tasks in many milestone or target versions then set starting and due date for each.
- The working progress and percent done of tasks would be updated frequently.
- In the end of a working day, I will review all complete and incomplete issues to have an overview of current status and then I will list tasks + issues need to complete for tomorrow.

Team working skill

- Software and website development require working in team. Each member is responsible for appropriate tasks. Meetings are required to get team members updated project status.
- Team member needs to active in problem solving, in which they need to support or ask for support from others in case the issues can affect the project progress.

Education and scholarlyship

- Certificate of Professional programmer – IMC institute – Quang Trung software park – 12 district, Ho Chi Minh city.
- Scholarships for students with good education results in programing school.
